Kyiv, Ukraine

HARD SKILLS

- CI/CD
- Jira/TestRail/Trello
- REST API
- SQL Queries
- DevTools
- VS Code
- Figma, Photoshop
- HTML/CSS
- JavaScript/React
- DBeaver
- TeamViewer

EDUCATION

GOIT Academy 2022
Quality Assurance Engineer

2020 - 2021
Full Stack JavaScript Developer

**National Pedagogical
Dragomanov University**
2002 - 2007

LANGUAGES

- Ukrainian - native
- English - intermediate
- Russian - fluent

WORK EXPERIENCE

Quality Assurance engineer SoftRyzen (department of GoIT) 2023-2024

- Testing at all stages of product development. Requirements testing, design testing, API testing, GUI, functional, usability, performance, interoperability, security, accessibility, configuration, and regression testing. Timely testing, especially in the early stages, reduced development time by 10-15%.
- Creation of test documentation. A large number of checklists were created and more than 1000 bug reports were opened.
- Collaborated with management and development/design teams to prevent failures at various stages of development, resulting in improved product quality and a 50% reduction in customer complaints.
- Worked with 2 relational databases (SQLite, PostgreSQL) mainly (select, update, delete) and remote device management.
- Tested the API (Postman, Swagger), and sent more than 1000 requests with basic HTTP methods.
- Verification of integration with the CRM system(ZOHO).
- Conducting interviews with interns (more than 10), creating test web applications (3), and checking test documentation.
- Automated the daily check of the site and its main function.

Head of 3D design department LLC OMFAL 2014-2022

Successful implementation of more than 1000 projects from commercial equipment to exhibition stands. My duties included:

- work planning from negotiations to delivery of the project to the customer.
- distribution of responsibilities in command.
- creation of technical specifications for the project, creation of technical drawings, graphics, TSD.
- control of work performance, timing, quality of execution
